Talicarb

■ IT

La società italiana **TALICARB** S.r.l., azienda produttiva appartenente al gruppo Angelo Ghezzi & C. Spa dal 1990, è stata oggetto di importanti investimenti non solo in ambito di modernizzazione degli impianti produttivi ma, nel corso degli ultimi anni, sostenuta dalle politiche commerciali del Gruppo Angelo Ghezzi, ha vissuto un forte rilancio sul mercato del proprio marchio TALICARB, intensificando ed ampliando notevolmente la gamma dei prodotti offerti, delineando 4 differenti linee di prodotto:

- Il programma storico di utensili standard in acciaio con riporto in metallo duro saldobrasato. Le soluzioni proposte da Talicarb sono caratterizzate principalmente da prodotti di fresatura ed alesatura.
- Il programma di fresatura in metallo duro integrale, con un'estensione di gamma da Z1 (fresa mono-tagliente) fino a soluzioni più avanzate multi-tagliente, è caratterizzato da fresa con diverse lunghezze, diverse tipologie di testa (piana o sferica) e differenti geometrie, per soddisfare un ampio range di lavorazioni ed applicazioni. All'interno del programma di fresatura in metallo duro integrale Talicarb è presente inoltre una linea di fresa ad alto rendimento "Power" specifica per stampisti.

- Il programma di utensili a fissaggio meccanico, abbinato ad ampia gamma di inserti ISO, nato per soddisfare ogni esigenza di produzione proponendo qualità di metallo duro con triplo strato di rivestimento CVD-PVD, può garantire ottime prestazioni sia in operazioni di sgrossatura che in quelle di finitura.
- Utensili speciali a disegno, a seconda del progetto e dell'esigenza specifica del cliente. In tal senso la flessibilità produttiva dello stabilimento Talicarb risulta essere ad ampio spettro, offrendo soluzioni speciali monolitiche o modulari con qualsiasi tipo di attacco, utensili speciali saldobrasati e utensili speciali a fissaggio meccanico.

■ EN

The Italian company TALICARB Srl, a production unit belonging to the Angelo Ghezzi & C. Spa group since 1990, has been the subject of important investments not only regarding the modernization of the production plants but, over the last few years, supported by the commercial policies of the Angelo Ghezzi Group experienced a strong relaunch on the market of its TALICARB brand, significantly intensifying and expanding the range of products offered, outlining 4 different product lines:

- The historical program of standard solid carbide brazed tools. The solutions proposed by Talicarb are mainly characterized by milling and reaming products.
- The solid carbide milling program, with a range extension from Z1 (single-edge cutters) to more advanced multi-cutting solutions, is characterized by cutters with different lengths, different types of head (flat or spherical) and different geometries, to satisfy a wide range of processes and applications. Within the Talicarb solid carbide milling

program there is also an high performance line called "Power", with cutters specific for mold makers.

- The program of indexable tools, combined with a wide range of ISO inserts, created to satisfy every production need by offering solid carbide qualities with triple CVD-PVD coating, can guarantee excellent performance in both roughing and finishing.
- Special tools proposed according to drawings, according to the project and the specific needs of the customer. In this sense, the production flexibility of the Talicarb plant is wide-ranging, offering special monolithic or modular solutions with any type of shank, special brazed tools and special tools with indexable inserts.

HPA

FRESE PER ACCIAI TEMPRATI FINO A 55 HRC
End Mills for hardened steels up to 55 HRC

Frese a testa piana in metallo duro integrale micrograna.
Square end mills in solid carbide micro grain.

Per Acciai Temprati ≤55 HRC
For Hardened Steels ≤55 HRC

Frese a testa piana con scarico in metallo duro integrale micrograna.
Square end mills long neck in solid carbide micro grain.

Per Acciai Temperati ≤68 HRC

For Hardened Steels ≤68 HRC

La gamma prosegue nella pagina successiva | The range continues on the next page >>

Frese a testa piana con scarico in metallo duro integrale micrograna.
Square end mills long neck in solid carbide micro grain.

| Diametro fresa End mill diameter | Lunghezza totale Overall length | Lunghezza di taglio Length of cut | Lunghezza utile Length of reach | Diametro attacco Shank diameter | Diametro collo Neck diameter | Effettiva lunghezza sotto collo, per diversi gradi di angolo di sforno. | | | | | |

- Per cave: valori ($a_e \leq 0,05xD$) ($a_e 1xD$) mantendo giri e avanzamento riportati in tabella. Contattare l'ufficio tecnico per maggiori dettagli sui diametri mancati.
- For slot milling: values ($a_p \leq 0,05D$) ($a_e 1xD$), maintaining the RPM and feed shown in the table. Contact the technical department for more details on the missing diameters.

EN

Di seguito vengono illustrati i due metodi disponibili per ordinare un utensile selezionato.

Below are the two available methods to order a selected tool.

| | | |
|---|---|--|
| ① | CODICE D'ORDINE Esempio: 1700HPF 3 | ORDER CODE: Example: 1700HPF 3 |
| ② | ART. NUM. Codice univoco di ordinazione Esempio: 441523 | ART. NUM. Unique ordering code Example: 441523 |

■ Legenda iconografica (dati tecnici) |Iconography (technical details):

| | IT | EN |
|--|---------------------------------------|--------------------------------|
| | Numero di denti | Flute number |
| | Angolo elica | Flute angle |
| | Angolo elica passo variabile | Angle Variable helix |
| | Angolo di spoglia | Rake angle |
| | Divisione irregolare dei taglienti | Irregular division |
| | Gambo cilindrico Tolleranza h6 | Straight shank h6 tolerance |

| | IT | EN |
|--|---|--|
| | Idoneo al calettamento a caldo | Shrink Fit |
| | Attacco Cilindrico HA 6535 | Straight shank HA 6535 |
| | Attacco Weldon HB 6535 | Weldon shank HB 6535 |
| | Riferimento pagina parametri di taglio | Cutting parameters page reference |
| | Riferimento pagina informazioni generali | General informations page reference |

■ Legenda iconografica (rivestimenti) |Iconography (coatings):

| | IT | EN |
|--|--|---|
| | Rivestimento HPF [HP - TiAlNSi - TiAIN - TiAlNSi+ - MULTI LAYER] | Coating HPF [HP - TiAlNSi - TiAIN - TiAlNSi+ - MULTI LAYER] |
| | Rivestimento HPV [HP AlCrN] | Coating HPV [HP AlCrN] |
| | Rivestimento HPX [HP ZOX] | Coating HPX [HP ZOX] |
| | Rivestimento HPX [HP AlTiN] | Coating HPX [HP AlTiN] |

| | IT | EN |
|--|---------------------------------------|----------------------------------|
| | Rivestimento HPD [HP Diamond] | Coating HPD [HP Diamond] |
| | Rivestimento HPA [HP AlTiSiN] | Coating HPA [HP AlTiSiN] |
| | Rivestimento HP [High performance] | Coating HP [High performance] |

■ Legenda iconografica (operazioni di fresatura) |Iconography (milling operations):

| | IT | EN |
|--|--------------|--------------|
| | CAVA | SLOTTING |
| | CONTORNATURA | SIDE MILLING |
| | RAMPA | RAMPING |
| | A TUFFO | PLUNGING |

| | IT | EN |
|--|----------------|--------------|
| | A PROFILARE 3D | 3D PROFILING |
| | A PROFILARE | PROFILING |
| | TROCOIDALE | TROCHOIDAL |

**■ Gruppo materiali ISO lavorabili | Group of working ISO materials:**

| | IT | EN |
|---|---------------------|------------------|
| P | Acciai | Steels |
| M | Acciai inossidabili | Stainless steels |
| K | Ghisa | Cast irons |

| | IT | EN |
|---|--------------------------------------|--------------------|
| N | Metalli non ferrosi | Non-ferrous metals |
| S | Leghe resistenti al calore e Titanio | HRSA and Titanium |
| H | Acciai temprati | Hardened steels |

■ Tabella conversione resistenza e durezza | Conversion table of tensile strength and hardness

| N/mm ² | Rockwell HRC | Vickers HV | Brinell HB |
|-------------------|--------------|------------|------------|
