SCHÜSSLER CODE CHIP

The Schüssler Code Chip is the basis for a holistic integration of your tool holders into your digital production. It makes the tool identification and the compatibility with various tool management software comfortable and simple. Due to the V shaped grooves in the pockets, the chip will adhere even at the highest speeds of production and furthermore has also a high wear resistance.

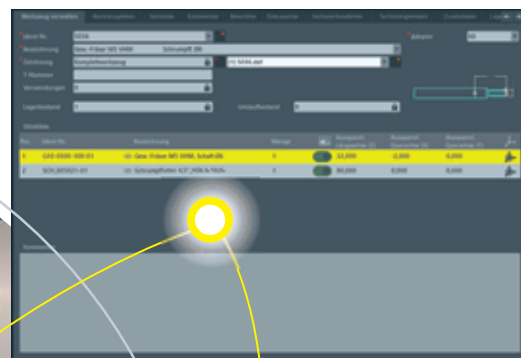

Chip pockets with V shaped grooves
guarantees a firm hold even at highest
speeds of production.

Subsequent fine balancing
ensures **a balancing quality of**
G2,5 @ 25.000 RPM
or **$U < 1 \text{ gmm}$**

The Code Chip can be read with a QR reader.
Consequently, the tool holder can clearly be
identified in a tool management software.

The Code Chip is available for the following tool holders as standard:

- HSK-A DIN 69893 / ISO 12164
- SK DIN 69871 / ISO 7388-1
- PSC (CORUM) ISO 26623-1

For many other tool holders, the Code Chip is available as a special article

MADE IN GERMANY

Your benefits

- μ Compatible with nearly any tool management software
- μ High contrast of the Code Chip guarantees simple reading of the QR-Code
- μ Tool identification without risk of confusion
- μ Limitation of crashes in your production

SCHÜSSLER Tool Holding Systems – Your Lead in Production!
